AARAV MENON

SOFTWARE DEVELOPER | Chennai, India | aarav.menon.dev@example.com | +91 90000 12345
github.com/aaravmenon-dev | linkedin.com/in/aarav-menon-dev

PROFESSIONAL SUMMARY

Software developer with hands-on experience building responsive web applications and Python APIs. Comfortable working across React interfaces, FastAPI services, relational databases, and cloud deployments. Focused on readable code, reliable integrations, and practical improvements measured through testing and user feedback.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React, Vite, responsive design, accessibility fundamentals

Backend & APIs: FastAPI, Flask, REST, authentication, request validation

Data & Cloud: PostgreSQL, MySQL, Pandas, AWS S3, AWS Lambda, Render

Tools & Practices: Git, GitHub, pytest, Postman, Docker basics, code review

EXPERIENCE

SOFTWARE DEVELOPER INTERN | Northstar Digital Solutions, Chennai | Jan 2025 – Jun 2025

- Built and maintained React features for an internal service dashboard, improving mobile usability and reducing repeated user steps.
- Implemented FastAPI endpoints for customer records and activity history, with Pydantic validation and consistent error responses.
- Integrated PostgreSQL queries and pagination; reviewed slow queries and added indexes for frequently filtered fields.
- Added pytest coverage for API validation and edge cases; used GitHub pull requests to collaborate and resolve review feedback.

JUNIOR WEB DEVELOPER | BrightPath Labs, Remote | Jul 2024 – Dec 2024

- Delivered responsive pages using React, JavaScript, and CSS from design handoffs; checked behavior across desktop and mobile layouts.
- Connected frontend forms to REST APIs and added clear loading, empty, and error states for better user feedback.
- Automated document uploads to AWS S3 using a small Python service and configured environment-based settings for deployment.
- Worked with QA and product teammates to reproduce reported issues, document fixes, and verify changes before release.

SELECTED PROJECTS

SERVICE REQUEST TRACKER | React, FastAPI, PostgreSQL

- Created a full-stack request management app with role-aware views, searchable records, status updates, and CSV export.
- Designed REST endpoints with input validation and pagination; added integration tests for create, update, and invalid-input flows.

DOCUMENT SEARCH API | Python, FastAPI, Pandas, PostgreSQL

- Built a data import and search workflow that cleans uploaded CSV records, reports invalid rows, and indexes validated entries.
- Added structured logs and a health endpoint to make deployment checks and troubleshooting straightforward.
- Built a lightweight test dataset and documented setup and API usage so another developer could run the project locally.

EDUCATION

Bachelor of Engineering in Computer Science | East Coast Institute of Technology, Chennai | 2020 – 2024 | CGPA: 8.3/10

CERTIFICATIONS & LEARNING

AWS Cloud Practitioner Essentials (training) | Python for Everybody (University of Michigan, Coursera) | Regular practice with API design, testing, and data structures

ADDITIONAL

Languages: English, Tamil | Availability: Immediate | Work preference: Remote or hybrid
